FedACH Risk[®] Management Services

Quick Reference Guide

Creating an RDFI Alert Service Criteria Set: Notice of Government Reclamation Requests

A BATCH-level Criteria Set

A criteria set created to notify on incoming government reclamation requests

Can help your institution's ACH operations staff prepare to respond promptly to government reclamation requests

Receive notice at the time FedACH[®] Services sends out receipt files, typically four times per day, regardless of when the files are posted into your institution's core application

Can help manage your institution's liability associated with the receipt of government benefit payments in the accounts of deceased accountholders

> Act as a useful tool regardless of whether ACH processing is on-site or through a processor

> This quick reference guide will show you how to create a criteria set, within the FedACH Risk RDFI Alert Service screens in the FedLine Web[®] access solution, that is designed to automatically generate alerts when the criteria conditions are met

> Please make NOTE of these universal TIPS for creating criteria:

✓ Always locate and click the SUBMIT button before moving away from an entry screen in order to ensure your work is saved

 ✓ File-level criteria sets use "OR" logic to allow a combination of criteria fields such as file debit value of \$X OR credit value of \$X

 \checkmark Both Batch and Item-level criteria sets use "AND" logic: conditions set in ALL criteria fields need to be met before an alert is sent. For example, a problem would be created by setting both a debit value AND a credit value for an item

✓ SEC code definitions apply; for example, a TEL cannot be a credit transaction. Use care not to inadvertently create an impossible combination

✓ Be sure to scroll down through entire entry screen

Overview of criteria creation steps

- Criteria Level:
 - ✓ BATCH
- Enter email addresses for the designated audience: financial institution's ACH operations staff and/or associated shared mailbox email addresses
- Give criteria set a meaningful name, e.g. "Gov Reclaim"
- Criteria field(s):
 - ✓ Company Entry Description of RECLAIM
- > Assign email addresses to receive alerts for this criteria set
- Click SUBMIT
- Email Alert: If criteria conditions are met, designated financial institution contacts receive email alerts at time FedACH Services sends out receipt files, typically four times per day, regardless of when the files are posted into the RDFI's core application

Batch-level Criteria

Service Overview of the three entry tabs

On Email Heading tab, enter / modify existing RDFI information to display in item-level alert email headings.

Enter the financial institution's name and contact information for the chosen RTN to be used on email notifications generated for any item-level alerts when and if item-level criteria are established. This heading information needs be entered only once, ideally the first time you begin using the service.

<u>On Email Contact tab</u>, enter / modify an email address book for contacts at the RDFI who will receive alert notices.

Enter RDFI internal staff or shared mailbox email addresses to receive alert notification emails; build "address book" of possibilities and assign contacts per criteria set.

On Criteria tab, enter / modify batch level scan criteria for an RDFI

Mix and match fields to create sets of unique monitoring criteria; each set gets a unique numeric identifier. Also assign email contacts to receive alerts for the particular criteria set.

Example Text:	Telephone: 555 url:www.ACH.E	5-555-5555, Fax: 555-555-5555, email:Customer.Service@ACHBank.cor DI.com

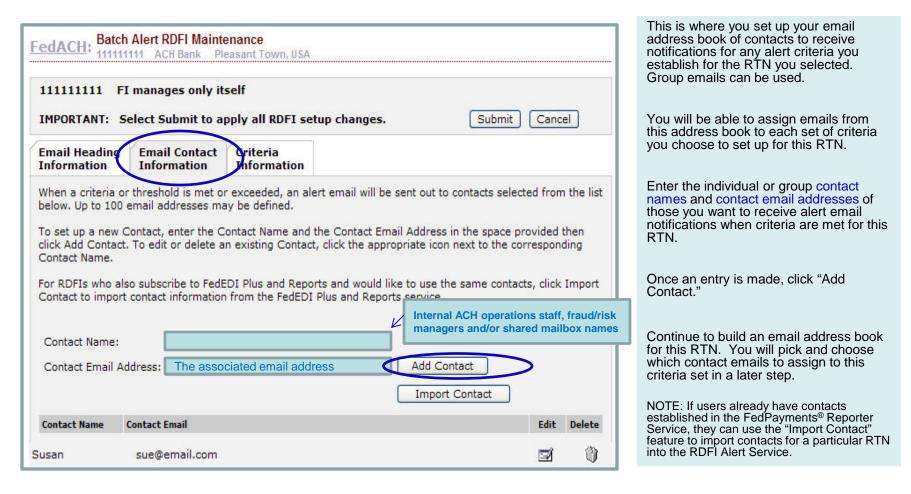

- The information entered on the "Batch Alert RDFI Maintenance" *Email Heading Information* tab appears on all item-level alert emails, both on those sent out to your customers/clients (receivers) as well as on those sent to internal RDFI staff.
 - Use the "contact information" field to direct customer inquiries to call centers or website URLs.

This criteria set is a batch-level criteria set that will generate emails to staff internal to your financial institution rather than to external customers. This heading information does not appear on batch-level email alerts, however we recommend you go ahead and get it set up at the time you establish your first criteria set in the service. If you would like to see how this RDFI heading information would show on an item-level alert established for and sent to a customer, a sample is available on FRBservices.org / Service Offerings / FedACH Services / FedACH Risk RDFI Alert Service / Sample batch and item-level notification emails at https://www.frbservices.org/financial-services/ach/risk/rdfi-file-alert.html#sample
